### DETAILED ACTION

Examiner notes that this Office Action is being remailed at the request of Mr. Bill Batista (37,525) because the previous Office Action of paper # 7 failed to clearly state the finality of that action. As such, the Examiner has agreed to re-send the Action, clearly state the finality of the same and restarting the time period for response..

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 47-49, 51, and 53-55 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,034,800, granted to Marchisi (hereafter Marchisi).

Marchisi discloses, referring to figure 1, a semiconductor die carrier comprising: a housing for holding at least one semiconductor die (1) and including: an end surface having a perimeter (3c); and a peripheral side wall (7a', 7b') connected to the end surface, extending about the perimeter of the end surface and including an outer peripheral surface and an inner peripheral surface; an inner wall (7a, 7b) within the perimeter of the end surface and including an outer surface spaced from and opposing the inner peripheral surface of the peripheral side wall, and an inner surface facing the center of the housing; and a plurality of conductive leads (3a,b) inserted through the peripheral side wall and the inner wall [claim 47], further comprising a cavity (5) extending between the inner peripheral surface of the peripheral side wall and the outer

surface of the inner wall [claim 48], further comprising a filler in the cavity to seal an interior of said housing (see abstract) [claim 49], further comprising a semiconductor die (1) received on the end surface; and the inner wall encircles the semiconductor die [claim 51], wherein the plurality of leads each comprise a substantially L-shape (see figure 4) [claim 54], wherein the peripheral side wall comprises a first material (plastic) and the end surface comprises a second material (metal) different from the first material [claim 55], wherein the leads are arranged in multiple spaced apart rows [claim 53].

***Allowable Subject Matter***

Claims 50 and 52 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,235,208, granted to Katoh.
